DETAILED ACTION

1. This is a response to the amendment dated 9/12/2007. Claims 1-18 are pending. Claims 14-18 were previously withdrawn from further consideration so that claims 1-13 are currently pending. The terminal disclaimer is also acknowledged. However, upon further consideration, new rejections are made below.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1 and 6-12 are rejected under 35 U.S.C. 102(b) as being anticipated by Hildebrand (3,763,726). Hildebrand discloses in figures. 1-5, and abstract, a surgical instrument having the limitations as recited in the above listed claims, including: a first elongate member (1) has a handle end portion, a working tip portion and a box hinge portion occurs at 4, where a second elongated member (2) has a handle end portion, a working tip portion and a box hinge portion at 4, where the first box hinge portion (see col. 3, lines 47-49) defines by a slot (7) having generally flat parallel sides, where the slot has a pivot point at 31 and where the second box hinge portion (see col. 3, lines 51-55) is capable of having a cross sectional shape conforming with the flat, parallel sides of the slot and being continuous in width with the handle and tip portions on either side of the box hinge portion, and where the second box hinge portion has a pivot point at 111, where the pivot points of the first box hinge portion mates with the pivot

points of the second box hinge portion see figs, 6-7, and where the handle end portion includes a circular handle and a locking mechanism (occurs at the inferior of element 6, fig.1) which interconnects at the far end of the handle end portion, and where the length of the handle end portion is generally longer than the length of the working tip portion (at best seen fig. 1, section 6 is definitely longer than section 5).

Allowable Subject Matter

3. Claim 13 allowed over the art of record.

Claims 2-3 and 4-5 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

As allowable subject matter has been indicated, applicant's reply must either comply with all formal requirements or specifically traverse each requirement not complied with. See 37 CFR 1.111(b) and MPEP § 707.07(a).
